A body discovered a week ago in the Timbercreek subdivision on Hwy. 16 has been identified as Michael Moreno, who was reported missing in San Antonio on May 18. The 53-year-old was last seen in the 7800 block of Callaghan Road.

His remains were found May 28, by a resident who reported buzzards circling over the area. When they investigated and saw some shoes, they called authorities.

Authorities are continuing their investigation.
